

Parasitology

Test Report

Name :

Kit ID : GMCX9418

Gastrointestinal Test Report

sample ID:	GMCX9418	Specimen:	Fecal - Native
Received Date:		Completed Date:	03/12/2024

Test Result

Pathogenic Bacteria

Helicobacter pylori

not detected

Clostridium difficile

not detected

Shigella sonnei

not detected

Salmonella

not detected

Yersinia enterocolitica

not detected

Campylobacter jejuni/coli

not detected

Vibrio cholerae

not detected

E. coli O157

not detected

Enterobacteriaceae

not detected

Enteropathogenic E. coli (EPEC)

not detected

Enterotoxigenic E. coli (ETEC) LT

not detected

Shiga-Toxin-producing E. coli (STEC)

not detected

Enteroinvasive E. coli (EIEC)

not detected

Viruses

Adenovirus

not detected

Astrovirus

not detected

Norovirus GI/GII

not detected

Rotavirus A

not detected

Sapovirus (I, II, IV, and V)

not detected

Parasites

Cryptosporidium spp

not detected

Cyclospora cayentanensis

not detected

Entamoeba histolytica

not detected

Giardia lamblia

not detected

Test Information

Methodology: Laboratory specimens associated with this report were analyzed using molecular techniques. Total nucleic acids were extracted from the submitted sample and analyzed by PCR amplification using real-time qPCR. Endogenous and exogenous controls run simultaneously with patient samples ensure the correct operation of the extraction and PCR steps of this assay

Disclaimer: Results should be used in conjunction with clinical findings, and should not form the sole basis for a diagnosis or treatment decision. Negative results do not preclude pathogenic infection and should not be used as the sole basis for patient management decisions. Negative results must be combined with clinical observations, patient history, and epidemiological information.
